

Please leave XM satellite alone. It is such a pleasure to listen to the channels without the constant barrage of car dealers screaming ridiculous claims at you and all the rest of the ads that do nothing but insult the average intelligence, those ads of that type and the same old news every half hour is maddening, I travel a lot and was driven to installing a cd player in the car to get away from it, XM offers such a wide variety of programming that it would be a borderline crime to take it away from us via commercials. As far as the local weather and traffic reports, who would be hurt by it?? Let the NAB require of it's members that they clean up their acts, put greed aside and offer competitive programming.
